UAE Education Minister lauds Indian Education System

United Arab Emirates is developing the educational system at various stages in order to maximize its outputs in line with the progress of development in all fields, believing that education is the real bet for the future and the locomotive that moves in the UAE to an era beyond Oil. In order to improve the quality and quality of education. UAE is keen to open up to the leading educational experiences in various countries of the world and to study ways of benefiting from them in the development of the education system in the country. This is clearly indicated by His Excellency Hussein Bin Ibrahim Al Hammadi, Minister of Education during his recent visit to New Delhi to learn more about India's experience in the field of education and human resource development. His Excellency stressed that the UAE is making efforts to improve the quality of education and develop educational institutions to develop international classifications. He pointed out that the UAE can work with India to develop a system for the classification of UAE institutes, open learning platforms (online education) that will be useful not only for Emirati students, but for the students in the Middle East and Africa. His talks with India's Minister of Human Resources Development will undoubtedly mark a shift in cooperation between the UAE and India in the field of education, both in terms of exchange programs and mutual recognition of diplomas.

India's experience in education is one of the most successful experiences at the regional and international levels. There is a consensus among experts and specialists that this experience is the key to India's successes and achievements in science, technology, space and scientific education, which offers a modern educational level comparable to that of developed countries, especially in the fields of technology, medicine and engineering. Indian schools encourage students to search and learn from the early stages and develop their creativity and innovative skills. Therefore, this rich experience can provide opportunities that can be used to improve the quality of education in the UAE and maximize its outputs in a manner that contributes to the proper training of students and the development of their skills.

The openness and use of pioneering educational experiences is an important aspect of the UAE's education development strategies. His Highness Sheikh Mohammed bin Zayed Al Nahyan, Crown Prince of Abu Dhabi and Deputy Supreme Commander of the UAE Armed Forces, always stressed the need to study the developed countries that relied on education to achieve their comprehensive renaissance and to benefit from these experiences in the development of the education system in the country. His Highness spoke on the forty-seventh national day, to express the exceptional attention paid by the wise leadership in the country. "We believe that investing in human beings is the best investment," he said. "We believe that investing in human beings is the best investment, We are able to compete in the fields of development and progress and build a diversified economy in preparation for the post-oil phase, through advanced and modern education that builds qualified human cadres that always drive the UAE development locomotive to the top.

UAE's interest in education as a central issue is one of the top priorities for the vision of development, which works to provide an environment conducive to a world-class educational process and in line with Vision 2021 and 2071, which emphasize the role of knowledge and science in building future generations that lead the development process in various national workplaces.
