

NOTICE
Invitation for Bharat Buildcon 2027

Bharat Buildcon 2027, the 3rd edition of India's international exhibition for the **building materials, construction, and allied industries**, scheduled to be held from **03rd to 06th June 2027** at **Yashobhoomi Convention Centre, New Delhi, India**. The journey of Bharat Buildcon began with the successful launch of **Vibrant Buildcon 2025**. Encouraged by the strong response from the industry and international buyers, the event evolved into **Bharat Buildcon 2026 – One Nation, One Expo**, establishing itself as an international platform for India's building materials sector.

The exhibition brought together **importers, distributors, business delegations, architects, developers, procurement professionals, and industry stakeholders** from various international markets, creating opportunities for **sourcing, B2B meetings, and long-term business partnerships** with Indian manufacturers and exporters.

Bharat Buildcon 2027 aims to further strengthen India's position as a **global sourcing destination** for building materials and **significantly increase international participation**.

The exhibition will showcase leading Indian manufacturers and exporters across **key sectors**, including:

Ceramic Tiles & Sanitaryware	Bathroom Fittings & Accessories	Laminates & Plywood
Door & Cabinet Hardware	Marble, Granite & Natural Stones	Tile Adhesives & Grouts
Modular Furniture	Construction Chemicals	Paints, Wall Putty & Gypsum Board

Bharat Buildcon provides international buyers with opportunities to **meet Indian manufacturers, explore sourcing opportunities, identify reliable suppliers, discuss distribution partnerships, and establish long-term business relationships**.

India–UAE CEPA and Opportunities for UAE Businesses :- The **India–UAE Comprehensive Economic Partnership Agreement (CEPA)**, which entered into force on **1st May 2022**, has significantly strengthened the framework for trade and business cooperation between India and the UAE. Under the CEPA, the UAE agreed to **eliminate duties on 97% of its tariff lines**, accounting for **99% of Indian exports to the UAE by value**, while **90% of India's total exports to the UAE by value became duty-free immediately upon entry into force**. This enhanced market access creates **significant opportunities for UAE businesses** to explore sourcing from Indian manufacturers, particularly across sectors relevant to the building materials and construction industry.

VISION STATEMENT

To establish Bharat Buildcon as the world's largest and most influential platform for building construction materials, services, and technology - driving India's rise as a global infrastructure leader in alignment with the Viksit Bharat 2047 mission, anchored in the three pillars of Speed, Quality, and Sustainability.

MISSION STATEMENT

To unify India's fragmented construction and infrastructure ecosystem - bringing sectoral, regional and national associations together on a single, integrated platform that showcases the nation's full manufacturing strength, innovation capacity, and industry scalability to both domestic and global audiences.

CORE VALUES

- Trust
- Collaboration
- High Impact Value
- Innovation & Quality
- Global Connectivity
- Accessible Opportunities

Executive Summary: Bharat Buildcon 2026

Bharat Buildcon 2026 has successfully solidified its position as India's premier **"One Nation, One Expo"** platform, creating an unparalleled, unified ecosystem for the building materials, ceramics, and construction sectors. Hosted at the state-of-the-art **Yashobhoomi (India International Convention and Expo Centre - IICC)** in New Delhi, the exhibition served as a powerful, centralized sourcing hub designed to seamlessly bridge the gap between India's regional manufacturing clusters and global trade networks.

Marking a highly successful strategic evolution from its inaugural edition, the 2nd edition - Bharat Buildcon 2026 scaled up significantly to match the demands of a rapidly growing global market. The event brought together a diverse and high-profile array of industry stakeholders under a single roof, including:

- **330+ Exhibiting Companies** showcasing cutting-edge technologies and global trends.
- **750+ International Buyers** representing high-growth markets looking to diversify their supply chains.
- **40,000+ Domestic B2B Visitors**, including prominent architects, builders, developers, and distributors.
- **Major Government Procurement Bodies**, fostering critical public-private partnerships and aligning with national infrastructure goals.

Driving Trade and Institutional Alignment

A cornerstone of Bharat Buildcon 2026's success was its robust institutional backing. Formally supported by the **Ministry of Commerce & Industry, Ministry of Housing & Urban Affairs and CAPEXIL** (Chemical and Allied Products Export Promotion Council), the expo acted as a critical catalyst for economic growth. By providing a direct channel to major government buying agencies, the platform facilitated high-value domestic contracts while simultaneously accelerating international export pipelines.

Elevating "Made in India" on the Global Stage

The exhibition went beyond a traditional trade show by actively elevating Indian manufacturing capabilities. It provided a world-class stage for regional clusters - such as India's globally recognized ceramics and stone hubs to demonstrate their technological advancements, sustainability initiatives, and cost-efficient production capacities. By connecting these local powerhouses directly with international decision-makers, Bharat Buildcon 2026 has effectively rewritten the playbook for Indian construction material exports and established a lasting legacy for the industry's future growth.

Building the Foundations of Viksit Bharat 2047

The vision of **Viksit Bharat @2047** aims to transform India into a fully developed nation by the centenary of its independence. A developed nation requires world-class, sustainable, and resilient infrastructure. The building materials sector is the literal foundation of this transformation.

Bharat Buildcon acts as a primary catalyst for this national vision by shifting the domestic industry from low-value manufacturing to high-tech, sustainable, and globally competitive production. By integrating cutting-edge technology, smart home automation, and green building materials into mainstream construction, the exhibition directly supports the country's modernization goals and sustainable urbanization mandates over the next two decades.

India is Building the Future

India is currently undergoing one of the fastest and largest infrastructure expansions in global history. Driven by massive public and private investments across smart cities, mega highways, commercial corridors, and affordable housing, the country has become the world's construction capital.

"India is Building the Future" signifies that the country is no longer just consuming global design and engineering standards - it is actively setting them. Indian manufacturers are pioneering scalable solutions in eco-friendly ceramics, low-carbon cement, modular construction hardware, and energy-efficient materials. This industrial surge positions India as a dependable, alternative global manufacturing powerhouse capable of building the future both at home and abroad.

Why Bharat Buildcon Matters

While individual manufacturing clusters in India (such as the ceramic hubs in Morbi or the hardware clusters in northern India) possess immense production power, the industry historically operated in a fragmented manner.

Bharat Buildcon matters because it provides the ultimate solution to this fragmentation:

- **A Unified National Platform:** It serves as the definitive "One Nation, One Expo." bringing together diverse product segments under a single roof.
- **Global Export Gateway:** It directly connects Indian MSMEs and large scale manufacturers with high-value international trade channels, helping brands bypass complex intermediary networks
- **Government-to-Business (G2B) Integration:** Backed by the Ministry of Commerce & Industry, Ministry of Housing & Urban Affairs and CAPEXIL, it aligns corporate production with national trade policies, helping manufacturers navigate global Technical Barriers to Trade (TBT) and secure massive domestic public procurement

THIS IS WHERE THE JOURNEY BEGAN

Shri Piyush Goyal Ji

Hon'ble Commerce and Industry Minister

Bharat Buildcon Curtain Raiser - 29th August 2025

"Today, on National Sports Day, as we celebrate the achievements of Dhyan Chand ji - just like his code for India, all of you build for India. From a regional small-scale program, your desire to take it up to a much larger scale is truly noteworthy, and I'm sure this time the program will be even grander, bigger, and bolder. I'd like to compliment all the organizers for their bold vision - from a regional small-scale program, your desire to take it up to a much larger scale, a much bigger event, is truly noteworthy.

We need to assess all the different sectors related to your industry and make sure everybody participates so that this becomes truly a one-stop shop for the entire industry... your '26 program should clearly reflect the growing India story and showcase to the world our capabilities in different aspects of the building industry, real estate industry, infrastructure sector.

I would suggest that you may also look at attracting other countries to participate in this program. Let there be country pavilions of friendly countries from around the world... One big advantage of that will be, you'll become more self-sufficient, you won't have to depend on any outsiders or government support. I think we must make every effort to make the '26 edition totally free of government interference... let this be a completely self-sufficient, industry-led initiative.

Let me share with you one small data point... there is a shortage of 1 million homes in Australia. 1 million homes which they need to build like yesterday. That's the sense of urgency... they're willing to help with financial support, give full access to Australia from Indian experts, Indian skilled labour, and train them in the initial period so that they get certified for Australian standards. And if we miss the bus, if we don't cash this opportunity, we will only have ourselves to blame.

Our architects, our professionals, engineers, structural engineers, all of them will get new opportunities. The financial sector will get a boost, and I think it'll be a game-changer for the entire build sector.

Even one or two bad suppliers can completely ruin the great India story, the image of Indian quality products. Honorable Prime Minister Narendra Modi ji has been consistent in his messaging: zero defect, zero effect.

Let us build infra that binds India together on the journey to Viksit Bharat 2047... My best wishes to Bharat Buildcon, and I'm very confident this will be a great success now with the collective effort of all the associations."

THANK YOU, MINISTRY OF HOUSING & URBAN AFFAIRS

Shri Manohar Lal

Hon'ble Minister of Power & Housing and Urban Affairs

at the 17th NAREDCO National Convention, held on 29th August 2025.

We are especially honoured that Shri Manohar Lal Ji, Hon'ble Minister of Housing and Urban Affairs, graced the occasion as the Chief Guest and formally inaugurated the Convention - lending the Ministry's authority and vision to a gathering of India's most consequential voices in real estate, infrastructure, and construction.

His presence was not ceremonial. It was a signal - to every developer, manufacturer, and urban planner in that room - that the government's commitment to housing, to cities, and to the millions of families waiting for a home of their own, is alive, present, and engaged at every level.

"The Ministry's participation reminds us that policy and industry are not parallel conversations they are the same conversation, held in different rooms. On 29th August, those rooms became one."

We are proud of this partnership. We are grateful for this trust. And we remain committed to building an industry that is worthy of the direction the Ministry has so consistently pointed us toward.

**With profound gratitude,
Bharat Buildcon**

When the Ministry of Housing and Urban Affairs chose to stand with Bharat Buildcon, it was more than institutional support. It was an affirmation - that India's building and construction sector deserves the attention of its highest policy offices, and that the work happening on expo floors and conference halls is inseparable from the nation's larger urban ambition.

On behalf of Bharat Buildcon, we record our deepest gratitude to the Ministry of Housing and Urban Affairs for their steadfast partnership

Chairman's Message

Shri R. Veeramani

Chairman, CAPEXIL

Dear Friends, Industry Partners, and Distinguished Stakeholders,

I am delighted to present this message for the Bharat Buildcon 2026 Post-Show Report, an event that successfully showcased the innovation and global competitiveness of India's Building & Construction Materials sector.

As an Export Promotion Council under the Ministry of Commerce & Industry, CAPEXIL is dedicated to expanding international market access for Indian exporters. Our strategic partnership with Bharat Buildcon perfectly aligns with this mission. The exhibition served as an exceptional platform, connecting Indian manufacturers with global buyers and highlighting India as a premier, reliable sourcing destination.

The 2026 edition was a major milestone. It successfully facilitated meaningful business interactions, technology exchanges, and strategic collaborations essential for driving sustainable export growth. The overwhelming response from all participants reaffirms the immense value of this global platform.

CAPEXIL looks forward to strengthening our partnership with Bharat Buildcon in the coming years to continue positioning India as a preferred global supplier. I extend my deepest gratitude to the Hon'ble Ministers, government officials, industry leaders, overseas buyers, and the organizers whose support and vision made this event a resounding success.

I am confident future editions will scale even greater heights.

With best wishes for continued success.

Chairman's Message

Shri. Nilesh Jetpariya

Chairman, Ceramic Division, CAPEXIL

As Chairman of the Ceramic Division at CAPEXIL, I have spent this past year working along side the Bharat Buildcon team. Every strategic conversation about which markets to target, every push to bring serious international buyers to the table rather than casual visitors, every effort to ensure our building materials exporters had a platform credible enough to stand on in front of the world - that work happened quietly through the year, long before the doors opened at Yashobhoomi.

What I saw in this edition validates every hour of that effort. Bharat Buildcon has matured into something India's building materials sector genuinely needed: a platform where our manufacturers are not merely exhibiting their products but negotiating as equals with buyers from across the world. That shift - from showcasing to dealmaking, from footfall to firm commitments - is the real measure of how far this expo has come, and it did not happen by accident.

I would also like to thank the Ministry of Commerce and Industry and the Ministry of Housing and Urban Affairs for their continued support, which gave this platform the institutional credibility it needed.

My commitment, and Capexil's, does not end when the halls close and the stalls come down. We will continue working with the Bharat Buildcon team through the year ahead, exactly as we did this one, so that the next edition builds on this momentum rather than starting from zero. India's construction industry has earned its place on the global stage. Platforms like Bharat Buildcon are how we make sure it stays there and grows stronger with every edition that follows.

Director's Message

Mr. Jitendra Kathiriya

*Director, Bharat Buildcon,
Member of Board of Trade*

The economic impact of a summit of this scale extends far beyond the exhibition floor. It serves as a catalyst for macroeconomic growth, stimulating manufacturing, logistics, hospitality, and supply chain infrastructure and driving momentum across the wider industry.

This milestone is the direct result of a year of rigorous planning and dedication by our organizing committee, our exhibitors, and the domestic partners who shared our vision. Bharat Buildcon has established itself as the premier platform for enterprise networking, high-level collaboration, and international trade promotion-bringing manufacturers, suppliers, architects, developers and policymakers together into a single ecosystem.

Over the course of the year, our team worked to bring more than 20 associations from across India's building materials fraternity onto this platform, ensuring that Bharat Buildcon spoke not for one region or one segment, but for the industry as a whole. That collective voice is what gave this expo its credibility with international buyers.

The thousands of high-value business interactions facilitated this edition are already laying the groundwork for joint ventures and long-term commercial opportunities. Together, we are strengthening the foundational pillars of India's construction and infrastructure landscape and steering the industry toward a more prosperous, resilient future.

Director's Message

Mr. Vishal Acharya

Director, Bharat Buildcon

When we set out with the vision of "One Nation, One Expo." we wanted to bring India's fragmented building materials sector together under one roof, speaking with one voice to the world. Looking back at the four days we lived through at Yashobhoomi, this vision exceeded what we imagined.

Looking back at those four days, one line keeps returning to me, because it captures everything this expo set out to be: India's readiness meeting the world's expectations. Not readiness in theory, but readiness on the floor-in the finish of every tile, the precision of every catalogue, the confidence of every exhibitor explaining their product to a buyer who had flown in from the other side of the world. Through our Mega Reverse Buyer-Seller Meet, we created genuine business dialogue, not just a crowded floor walk, because lasting partnerships begin with real conversations, not exhibition footfall.

If I am honest, the real success of Bharat Buildcon will not be visible in this report at all. It will be visible a year from now, in the export orders that were quietly confirmed on this floor, in the manufacturing units that scale up because a buyer from another continent chose to trust an Indian supplier, and in the confidence with which our exhibitors now walk into any room in the world. That is the legacy I want this expo to be remembered for not the footfall, but what grew out of it.

On behalf of the entire Bharat Buildcon team, my heartfelt thanks to every minister, delegate, exhibitor, and visitor who made Bharat Buildcon 2026 a reality.

Jai Hind. Jai Bharat.

Director's Message

Mr. Vijay Aghara

Director, Bharat Buildcon

Bharat Buildcon 2026 has proved, beyond any doubt, that "One Nation, One Expo." is no longer an aspiration-it is a living reality. As I look back on these four days at Yashobhoomi, what stays with me most is not the scale of the numbers, though they are considerable, but the spirit in which this edition came together.

I am extremely proud to have witnessed the overwhelming participation of domestic visitors, building material associations, and builders from every corner of the country. Your presence on this floor-your questions, your business conversations and your willingness to explore new sourcing relationships-is what gave this expo its energy and its purpose. An exhibition is only as strong as the people who choose to walk through its doors with genuine intent, and that is exactly what we saw this year.

We warmly encourage all our domestic visitors and builders to continue engaging with this platform long after these four days conclude-to follow up on the connections made here, to pursue the opportunities that were opened, and to see Bharat Buildcon not as a one-time event but as an ongoing partnership in building India's construction and building materials future.

Together, let us continue building a stronger, more collaborative, and more prosperous future for India's construction industry.

Thank you. Jai Hind. Jai Bharat.

Event Overview: Bharat Buildcon 2026

Bharat Buildcon 2026, held at the state-of-the-art **Yashobhoomi (IICC)** in New Delhi, stood out as a massive success and a benchmark event for the South Asian building materials industry. The four-day mega-exposition served as a high-octane hub for live product launches, technical knowledge seminars, and structured B2B matchmaking sessions.

The event successfully brought global scale to India's core manufacturing sectors, creating unmatched networking velocity and concrete trade opportunities for everyone involved.

Key Event Statistics

Dimension	Metrics
Venue	Yashobhoomi (IICC), Dwarka, New Delhi
Exhibitor Presence	330+ Exhibiting Companies
International Procurement Scale	750+ Verified International Delegates
Domestic Business Footfall	40,000+ Domestic Visitors (Architects, Builders, Distributors)
Core Institutional Support	Ministry of Commerce & Industry, Ministry of Housing & Urban Affairs Government of India & CAPEXIL

Voices of Vision: Inspiring Messages from Our Esteemed Dignitaries

Shri Manohar Lal

Union Minister of Power & Housing and Urban Affairs

"I congratulate all the nation-builders present in this event of Bharat Buildcon and welcome you all. This four-day seminar brings together manufacturers associated with construction materials, construction work, technology, and solution providers on one platform to exchange views and reflect on future needs. The country must prepare for a significant increase in urbanized population, projected to reach 60 crore by 2030 and 80 crore by 2047, which will require a rapid increase in the pace of construction. To keep up with growing urbanization, the industry faces the challenge of building more than 1 crore houses in cities every year. There is a critical need to focus on the durability of long-term building construction.

Building requirements should specify expected durability (e.g., 50, 100, or 500 years) rather than following a standard duration. To prevent national and entrepreneurial losses caused by buildings that are not fit for living, the industry should implement a "certified system of durability" for every building to ensure they are safe and secure. The industry must focus on time-saving and environmentally friendly technologies, including: Pre-fabricated (Pre-fab) materials to increase speed and reduce pollution, 3D printing as an emerging construction technology, Engineering Bamboo as an alternative to steel rebars in construction. If any kind of help is needed from the government in this, then surely whatever you tell us, we are ready to do it."

Shri Jitin Prasada

Union Minister of State for Commerce & Industry and Electronics & IT

“Today, I can say with great pride that countries which were earlier yet to fully explore India's potential are today extremely eager to see, engage, and partner with India because India has emerged as the talent capital of the world and the manufacturing hub of the world. For the building fraternity, this Buildcon is a 'Mahakumbh' where you will find everything from small fittings and furniture, to cement, steel, and interiors. At one point of time, our large population was seen as a challenge but today, these 1.4 billion people are India's greatest strength. They have the purchasing power.

They have the purchasing power. They have the spending capacity. They have become quality conscious. And I want to share with our esteemed foreign participants that we warmly welcome your partnership with India. We invite you to grow here, to invest here, and to build here shoulder-to-shoulder with us. We want our MSMEs to grow alongside you, in a spirit of true and equal partnership. Under Prime Minister Modi ji, India has ensured free trade market access to 70% of the developed world including the European Union, Australia, Oman, and New Zealand. And just yesterday, Prime Minister Modi ji launched the India–UK CEPA agreement, which comes into effect from the 15th of July opening yet another significant new market for Indian industry.

Under Prime Minister Modi ji's vision, India has also become a hub for semiconductor manufacturing, design, and packaging building the entire ecosystem domestically, so that India is self-reliant in technology. That is Atmanirbhar Bharat in its truest and most complete sense.”

Shri Mansukh Mandaviya

*Union Minister of Labour & Employment and
Youth Affairs & Sports*

“Just as the Prime Minister wants our women to come forward in public life and become partners in the country's decision-making, therefore, 50% reservation has been given in the local body government, but by giving 33% women's reservation in the Assembly and Parliament as well, Modi ji has taken steps forward for women's empowerment.

A nation's history proves that women have played a vital role in nation-building. Not only in business, whether it is our rural economy, running the family, or if we talk about rural life, and I feel very good today; when I came, I was told that the number of visitors who came in four days in the first edition, more visitors than that came in just two days this time.

The business doubled from that right now due to the West Asia crisis, there might not have been as much attraction as there should have been, but this expo of yours is a success. Because when you talk about building construction materials, I believe that it is not only building construction materials, it is not just gravel and roads, it is much more than that, which plays an important role in the building of our nation. And today, on this occasion, I give my best wishes to NAREDCO MAHI. You will also become equal to men and participate in their business, you will develop entrepreneurship yourselves.

Such platforms encourage you, such platforms build your confidence, such a platform gives an opportunity to share each other's experiences so that we too can move forward on this path and advance ourselves in the direction of encashing opportunities.”

Dr. Niranjan Hiranandani

*Managing Director of Hiranandani Group
Chairman, NAREDCO*

“Bharat, our time has come. We are now going to lead the world. Our prime minister has taken that initiative. With all the headwinds, we are growing at 7.4% GDP growth. Real estate is not just housing. It is commercial development, logistics, data centers, healthcare, education, infrastructure.

The changes in the industry are going to be AI-driven. We will have BIM. We'll have smart project management, decisions will be more data-driven as compared to the gut feel that we used to have earlier for the purposes of designing our buildings and creating products which are not getting sold. We will have to do more industrialized construction. There are steel structures which will come up in the future. They're going to be pre-cast structures, modular technologies, and automation will make a difference. We have to go and rapidly develop our products. We have to actually deliver.

We have to have energy efficiency. We have a hope and aspiration that real estate in the next five years will be better than the last 25 years. That is the hope and direction. We will be Aatmanirbhar. That is what Bharat Buildcon is about. Materials manufactured, delivered, and used in India. Bharat has to be on the top of the world. We will not be second best. I don't want to be number four in GDP. I don't care if we are number five. But we will be the best in the world. That is what Bharat has to become.”

Shri Parveen Jain

President, NAREDCO

“The continued growth of India's construction and real estate sectors depends on innovation, knowledge sharing, and the ability of industry stakeholders to work together. Bharat Buildcon 2026 successfully embodied this vision by bringing together businesses, technology providers, policymakers, architects, engineers, and developers to exchange perspectives and explore new opportunities.

The exhibition showcased an impressive range of advanced building materials, smart infrastructure solutions, digital technologies, and sustainable innovations. Beyond the exhibits, it created a valuable environment for business engagement and strategic partnerships that will help strengthen the industry's future.

At a time when India is witnessing unprecedented investments in housing, urban infrastructure, and commercial development, initiatives like Bharat Buildcon play a vital role in connecting innovation with implementation. They encourage meaningful industry engagement, accelerate the adoption of modern technologies, and support the creation of a stronger and more competitive construction ecosystem.

Events of this scale become successful through the collective energy and participation of the industry. I appreciate the vision of the organisers in creating a platform that encourages progress, collaboration, and excellence, and I look forward to seeing this initiative continue to grow and contribute meaningfully to the nation's development.”

Ms. Neerja Singh

Assistant Secretary General, Federation of Indian Chambers of Commerce and Industry (FICCI)

“It is a pleasure to share this message, marking the successful conclusion of an event that reinforced India's growing stature as a preferred sourcing destination for quality building materials and construction solutions.

At FICCI, our endeavour is to promote impactful platforms that drive business growth and enhance India's global competitiveness. Bharat Buildcon 2026 exemplified this vision by bringing together policymakers, manufacturers, technology providers, investors, project developers and international buyers on a common platform to collaborate and build meaningful business partnerships.

A defining feature of this edition was the Reverse Buyer-Seller Meet (RBSM), which facilitated structured B2B engagements between Indian manufacturers and overseas buyers from across the world. The event brought together more than 250 Indian exhibitors and buyer delegations from over 90 countries.

It was heartening to see the enthusiastic participation of trade bodies at Bharat Buildcon 2026, reflecting the collective commitment of industry stakeholders towards strengthening India's building and construction ecosystem.

We are confident that the momentum generated through this edition will pave the way for greater achievements and stronger collaborations in the future. We wish Bharat Buildcon continued success.”

Prof. Kiran S Mahajani

President, Council of Architecture (COA)

"It is with a profound sense of accomplishment and genuine delight that I look back on the successful conclusion of Bharat Buildcon, where the Council of Architecture (COA) had the privilege of serving as the Knowledge Partner. This prestigious engagement was bolstered by the invaluable support of the Ministry of Commerce and Industry and the Ministry of Housing and Urban Affairs, underscoring the critical intersection of architecture, policy, and national development.

As part of our knowledge partnership, the COA through its academic wing, Training and Research Centre (COA TRC), New Delhi, hosted a dedicated symposium and panel discussion series titled "Parampara se Pragati Tak" Celebrating the journey from timeless traditions to innovative futures, a dialogue bridging tradition and progress in the built environment. The symposium featured two thought-provoking panel discussions, bringing together 14 distinguished panellists and 2 eminent moderators from across the architectural, academic, and policy-making domains. The session witnessed an overwhelming response, with over 300 architects and industry professionals in attendance, reflecting the growing appetite for meaningful discourse within our fraternity.

This event stands as a testament to the COA's commitment to fostering continuing education, research, and professional development within the architectural community. Such initiatives reaffirm the Council's unwavering commitment to the advancement of architectural education and professional practice. Through knowledge-sharing platforms, research advocacy, and collaborative engagements, we strive to elevate standards and equip our members for the challenges of tomorrow.

I am pleased to note that both the symposium and the broader Bharat Buildcon event were resounding successes-milestones in our collective journey toward a more sustainable, inclusive, and innovative architectural ecosystem. These gatherings are not merely events; they are stepping stones toward fostering a culture of excellence, dialogue, and purposeful collaboration.

We look forward to many more such partnerships and opportunities to contribute meaningfully to the nation's architectural and urban development agenda. The Council remains steadfast in its mission to serve the profession and society at large."

DISTINGUISHED DIGNITARIES & OFFICIAL PARTICIPATION

The following senior Government officials, Ministers, and industry leaders graced Bharat Buildcon 2026 across its four days, underlining the extraordinary institutional support for this national platform

DAY 1 – 18th JUNE 2026

INAUGURATION DAY

Shri Manohar Lal

Union Minister of Power & Housing and Urban Affairs

Participation: Hon. Chief Guest – Inauguration Ceremony

Shri Manohar Lal co-inaugurated the expo, lending the full weight of the Housing and Urban Affairs Ministry to the event. His presence reinforced the Government's commitment to India's urban infrastructure revolution and the alignment of Bharat Buildcon with national housing development goals.

Shri Jitin Prasada

Union Minister of State for Commerce & Industry and Electronics & IT

Participation: Hon. Chief Guest – Inauguration Ceremony

Shri Jitin Prasada inaugurated Bharat Buildcon 2026 and championed India's vision as a global manufacturing and sourcing destination. He emphasized the platform's critical role in connecting innovators and policymakers to unlock new trade frontiers under PM Modi's quality-first mission.

Shri Parshottam Rupala

Member of Parliament (MP)

Participation: Hon. Guest of Honour – Inauguration Ceremony

Shri Parshottam Rupala graced the inauguration as an eminent Member of Parliament, symbolizing the legislative support behind India's construction and building materials ecosystem. His participation highlighted the national political commitment to empowering Indian manufacturers on the global stage.

Shri Rajesh Agrawal, IAS

Commerce Secretary, Government of India

Participation: Stakeholder's Meeting chaired by

Shri Rajesh Agrawal participated in a high-level Stakeholder's Meeting discussion with exhibitors and industry leaders, providing critical insights into India's export promotion strategies. His engagement translated into actionable policy directions for the building materials sector's global expansion.

DAY 2 – 19th JUNE 2026

Shri Ashok Meena, IAS

Secretary, Department of Drinking Water and Sanitation

Participation: Close Door Meeting & Exhibition Visit

Shri Ashok Meena conducted an in-depth walk-through of the expo, with particular focus on sanitation infrastructure solutions and sustainable construction materials. His visit created meaningful linkages between exhibitors and the Swachh Bharat Mission, opening significant procurement avenues.

Dr. Niranjan Hiranandani

Managing Director of Hiranandani Group

Chairman, NAREDCO

Participation: NAREDCO Conference Speaker & Exhibition Visit

Dr. Hiranandani delivered a landmark address at the NAREDCO Conference, drawing on decades of real estate expertise to outline the future of India's housing and construction sector. His vision for public-private collaboration and affordable housing resonated deeply with the 40,000+ gathered delegates.

Shri Mansukh Mandaviya

Union Minister of Labour & Employment and Youth Affairs & Sports

Participation: Hon. Chief Guest – NAREDCO Mahi Conference

Shri Mansukh Mandaviya electrified Day 3 at the NAREDCO Mahi Conference, declaring that the first two days of the expo had already doubled the footfall of entire comparable industry exhibitions. His endorsement cemented Bharat Buildcon's standing as India's most impactful construction platform.

Shri Yashvir Singh

Additional Secretary, Department of Commerce, Government of India

Participation: Exhibition Visit

Shri Yashvir Singh undertook a comprehensive walk-through of the expo floors, reviewing India's export-ready manufacturing capabilities across 24 product categories. His engagement underscored the Department of Commerce's active role in connecting Indian MSMEs with international trade opportunities.

Smt. Smriti Irani

Former Union Cabinet Minister, Government of India

Participation: Exhibition Visit

Smt. Smriti Irani's visit to Bharat Buildcon 2026 was a moment of inspiration – she interacted with exhibitors and shared powerful insights on women's empowerment, leadership, and India's growth trajectory. Her presence celebrated innovation, inclusivity, and the rising aspirations of Indian industry.

Smt. Aishvarya Singh

Joint Secretary & Mission Director, Swachh Bharat Mission – Dept. of Drinking Water & Sanitation

Participation: Exhibition Visit

Smt. Aishvarya Singh walked through the expo with focused attention on sanitation, hygiene, and water solutions – directly linking exhibitors to the Swachh Bharat Mission's procurement needs. Her visit opened new corridors for building material companies to participate in transforming rural and urban India

DAY 4 – 21st JUNE 2026

Shri Amit Kumar

Joint Secretary, Department of Commerce, Government of India

Participation: Exhibition Visit

Shri Amit Kumar brought the expo to a powerful conclusion with his official walkthrough on Day 4. His focused engagement with exhibitors and international buyers reinforced the Department of Commerce's sustained commitment to export promotion and the global positioning of Indian building materials.

INAUGURATION CEREMONY

The mega expo commenced with a grand Inauguration Ceremony, officially inaugurated by Shri Manohar Lal, Hon'ble Union Minister of Power & Housing and Urban Affairs, Government of India. The auspicious occasion was graced and accompanied by Shri Jitin Prasada, Hon'ble Union Minister of State for Commerce & Industry, and Electronics & Information Technology, Government of India, and Shri Parshottam Rupala, Hon'ble Member of Parliament (Lok Sabha). The inaugural event underscored the exhibition's global scale, hosting an esteemed audience of over 750+ hosted international delegates. They were joined by prominent national association leaders, policymakers, developers, architects, and key industry stakeholders, marking a monumental beginning for India's building materials and construction sector trade network.

GALA DINNER & NETWORKING EVENING

To mark the conclusion of a successful opening day, an exclusive Gala Dinner was hosted on the evening of June 18, 2026. Designed as an event-exclusive highlight, the evening served as a premier high-level networking platform specifically dedicated to fostering deep business interactions between global buyers and prominent exhibitors. The prestigious gathering was graced by the presence of specially invited highest-ranking authorities, senior government officials, and elite ministry representatives alongside the 750+ hosted international delegates. Set against a backdrop of cultural elegance, this relaxed yet highly strategic environment outside the bustling exhibition floors allowed manufacturers, global procurement heads, and policymakers to connect one-on-one, discuss cross-border trade opportunities, and solidify partnerships that will drive the future of the infrastructure supply chain.

STAKEHOLDER & B2B MEETING

STAKEHOLDER MEETING

Stakeholder engagement took center stage at Bharat Buildcon 2026, with exclusive Round Table Meetings chaired by Shri Rajesh Agrawal, Hon'ble Commerce Secretary, Ministry of Commerce and Industry, Government of India. Held on the sidelines of the main expo floor, these closed-door sessions were designed to move beyond transactional trade discussions and into structured policy dialogue between industry and government.

The format encouraged candid exchange, allowing association heads and senior officials to surface on-ground challenges facing the construction materials sector alongside the policy levers needed to address them. Rather than a one-way briefing, the meetings functioned as a working consultation - setting the stage for the specific agendas taken up in the discussions. Bringing together international association heads, policymakers, and senior government officials, these high-level deliberations targeted critical industry agendas:

- **Global Sourcing Hub:** Accelerating trade protocol standardization to build resilient, friction-free export supply chains.
- **Policy Harmonization:** Overcoming Technical Barriers to Trade (TBT) and optimizing Free Trade Agreements (FTAs) to boost Indian construction materials globally.
- **Viksit Bharat@2047 Integration:** Aligning heavy manufacturing clusters (ceramics, steel, cement) with green infrastructure standards and long-term domestic development goals.

B2B MEETING

To efficiently translate global interest into tangible commercial business, Bharat Buildcon 2026 condensed its transactional networking into two dedicated B2B lounges exclusively designed for International Buyers and Exhibitors. These structured, high-frequency matchmaking areas eliminated standard exhibition floor distractions, allowing for direct negotiations, bulk procurement finalizations, and the signing of major export contracts.

Alongside the exhibition floor, a "Mega RBSM" - was held as a unique networking event between overseas importers and Indian manufacturer-exporters of building materials. The format was designed to move conversations quickly from introduction to commercial outcome, with curated meeting slots and dedicated space enabling delegations to complete in days what would typically take months of outreach.

With 330+ Indian exhibitors and 750+ international buyers drawing trade visitors and buyer delegations from over 90+ countries, the B2B lounges hosted a genuinely global spread of meetings - spanning chambers of commerce, trade bodies, and corporate delegations across geographies and sectors, all converging on structured, results oriented negotiations over the four-day event.

India's Construction & Building Material Opportunity

Infrastructure Revolution

Bharat Buildcon 2026 acted as a well-timed industry spark in this changing landscape. By bringing together manufacturers, technology providers, contractors, government planners, financial institutions, and international delegates on one platform, the exhibition focused on the collaboration needed to support India's infrastructure growth.

Exhibitors showcased new ideas in precast construction, smart building systems, green materials, and mechanical solutions that meet the demands of national infrastructure programs.

For buyers and procurement decision-makers, the event offered high-value interactions that replaced months of vendor evaluations. Policymakers and industry groups used the platform to discuss regulatory frameworks, public-private partnerships, and export support. International participants saw India's infrastructure pipeline as a major investment and trade opportunity. This highlighted Bharat Buildcon's role as not just an exhibition but a well-organised way to push forward India's infrastructure growth through commerce, innovation, and teamwork.

Building Materials Industry Growth

Bharat Buildcon 2026 was an event that brought people together from the building materials industry. It had manufacturers, distributors, architects, contractors and people who buy things all in one place. This meant that people could show off products, talk about prices and make deals all at the same time. Some companies that make kinds of materials like fly ash bricks, engineered wood and recycled aggregates got to meet buyers that they would not have met otherwise.

This would have taken them time to do on their own. People from countries came to Bharat Buildcon 2026 and got a good idea of what India can make and what it needs to import. This helped them talk about trade in a way that made sense.

Bharat Buildcon 2026 also had investors and banks that could see how the industry is growing by talking to people in the industry. The government people talked to manufacturers about making sure everyone follows the rules and about helping them sell their products to other countries.

Bharat Buildcon 2026 was very important for the building materials industry because it helped people meet each other, learn about technology and work together. It made it easier for companies to grow and be successful. Bharat Buildcon 2026 helped the building materials industry by making it easier for people to do business with each other and by helping ideas and technologies get used more quickly.

Smart Cities

The integration of smart city development with the construction industry is driven by intelligent buildings, sensor-enabled infrastructure, sustainable materials, and modular construction. Bharat Buildcon 2026 provided a dynamic platform where technology providers, construction companies, urban planners, policymakers, and investors came together to explore innovative solutions, build partnerships, and evaluate emerging opportunities in smart infrastructure.

The exhibition enabled international buyers to understand India's growing smart city market while allowing Indian manufacturers to learn from global best practices. It also facilitated discussions on policy, procurement, and technology adoption, helping bridge the gap between government initiatives and industry capabilities. By fostering collaboration across the smart infrastructure ecosystem, Bharat Buildcon 2026 reinforced its role as a catalyst for innovation, investment and sustainable urban development.

Housing and Real Estate

Bharat Buildcon 2026 helped the housing and real estate sectors gain from the construction show due to the presence of a dedicated platform for tackling issues in supply chain management, technology usage, and financing. Some of the innovations displayed at the show included prefab constructions, modular construction techniques, green building products, and technology for digital construction. Through the construction show, buyers, developers, and manufacturers could analyze and find appropriate solutions and partners.

The participation of domestic and international buyers, especially from Tier-2 and Tier-3 cities, helped generate several leads, partnerships, and exports. Bharat Buildcon 2026 helped in the coming together of policymakers, associations, financiers, and developers of projects due to policy dialogues, technology demonstrations, and buyer-seller dialogues. This helped in disseminating information, adoption of modular construction techniques and sustainability, and making of appropriate investment decisions.

Make in India

The Bharat Buildcon 2026 was a living example of the Make in India philosophy in the context of the construction industry. The event offered the Indian manufacturers of building materials, construction machinery, and finishing products a reliable and visible platform to prove their capability, quality of products, and export potential in front of the domestic buyers, international delegates, and procurement decision-makers at once. Participation at the exhibition helped in getting market validation on the spot while interaction with foreign delegates helped in benchmarking Indian manufacturers against international standards – an essential factor required to bridge the gap in perceptions regarding the quality of products. Engagement with investors helped in bringing investment to expand manufacturing capacities while discussion on policies helped in aligning industry capabilities with government preferences in procurement. Thus, the entire ecosystem got concentrated in one platform to make the Make in India dream a reality.

Global Export Opportunities

Exports of India's construction and building materials sector have shown consistent growth over time, owing to increased demand in the world market for products like ceramics, natural stone, steel products, sanitary wares, and construction chemicals. Increased investment in infrastructures across the world, along with supply chain diversification and adoption of the China plus one approach, have opened up export avenues for India's construction and building materials manufacturers. But difficulties faced by exporters include lack of market intelligence, insufficient international certification, increased logistics costs and poor visibility of India's global brand.

Bharat Buildcon 2026 was an important international exhibition platform for Indian manufacturers, wherein they were able to connect with international buyers, international trade organizations and delegates from different parts of the world. Product exposure, networking with the right people, and discussion about exporting helped the exhibitors in establishing trust and exploring new markets. Technical sessions regarding export compliance and regulations provided industry with important inputs on international trade practices.

Would you recommend this exhibition to other peers in the industry?

International Engagement & Global Reach

The World Comes To India

Bharat Buildcon was not just an exhibition; it was a declaration. For the first time, 24 sectors of India's building materials industry stood together under one roof, presenting the world with a single, powerful answer to the question of where quality construction materials come from.

The response from the global community was unambiguous. Buyers and exhibitors from across nations made their way to India: not out of curiosity, but with purpose. International buyers arrived seeking reliable partners. Indian manufacturers stood ready with the scale, quality, and pricing to meet that demand. And what surprised many visiting buyers was not just the range of products on display but also the standard of them, certified, competitive, and ready for global markets.

For India's exporters, Bharat Buildcon opened markets that were previously out of reach. Conversations that would have taken months to initiate across borders happened in days on the show floor. Orders were discussed, relationships were built, and trust, the hardest currency in international trade, was earned in person. Seeing international buyers engage with Indian manufacturers and leave with samples and business interest was a proud moment, proving India's growing global presence in the building materials industry.

We are proud to say that buyers left satisfied, and exporters left with an opportunity. That outcome is precisely what Bharat Buildcon was built to deliver, and it brings us measurably closer to our core mission of establishing India as the global hub for building material exports and the world's most trusted sourcing destination for the construction industry.

International Delegates

Bharat Buildcon 2026 witnessed an extraordinary and unprecedented level of international participation, establishing itself as one of the most globally diverse building materials trade exhibitions ever held in India. The event successfully welcomed **750+ international buyers from 90+ countries spanning 6 continents**, reflecting the immense global interest in India's rapidly growing building materials sector.

The participating nations included major developed economies such as the **United States of America, United Kingdom, Germany, Japan, Australia, Canada, South Korea, Switzerland, France, Ireland, Israel, Singapore, UAE, Saudi Arabia, Qatar** and many more - alongside emerging and growing markets from Africa, South Asia, Central Asia, and the Pacific.

To ensure maximum and barrier-free international participation, the organisers extended comprehensive hospitality support to select international delegates. This included **international airfare, hotel accommodation and travel reimbursements** - a significant investment that reflects the organisers' commitment to facilitating genuine, long-term global trade relationships rather than just a one-time exhibition experience.

The overwhelming international response to Bharat Buildcon 2026 is a powerful testament to the growing global confidence in Indian manufacturing, the quality of Indian building materials, and the effectiveness of Bharat Buildcon as a platform for international trade. With buyers from every corner of the world converging at Yashobhoomi, New Delhi, Bharat Buildcon 2026 has firmly established itself as **India's foremost gateway to the global building materials market**.

Hosted Buyer Programmes

Bharat Buildcon 2026 marked a defining milestone in international engagement, uniting a distinguished gathering of 750+ qualified buyers and industry leaders from 90+ countries, firmly establishing itself as a truly global platform for the construction and building materials industry. Every guest was embraced within a thoughtfully designed hospitality framework reflecting the warmth, ambition, and world-class vision that Bharat Buildcon stands for, ensuring their entire focus remained on forging powerful connections, discovering opportunities, and building partnerships that truly matter.

The exclusive Gala Dinner stood as one of the most celebrated highlights of the edition, an elegant evening where global buyers and leading exhibitors came together in an atmosphere of collaboration, celebration, and shared ambition, sparking conversations that extended far beyond the dinner table. Across four remarkable days, participants engaged in curated B2B sessions, high-level conferences, and expansive product showcases, each designed to open doors to meaningful partnerships, promising deals, and opportunities of lasting business impact.

The connections forged, the collaborations initiated, and the opportunities unlocked at Bharat Buildcon 2026 have laid a strong foundation for continued global engagement. The overwhelming satisfaction and enthusiasm expressed by every participant as they departed stood as a true testament to the power and purpose of this platform, and with great pride and anticipation, Bharat Buildcon looks forward to welcoming this distinguished global community once again at Bharat Buildcon 2027.

Buyer-Seller Meetings

At Bharat Buildcon, we did not leave business to chance. Every interaction was structured to convert interest into opportunity.

Across our exclusive International Lounge, personalised exhibitor meetings, and live show floor interactions, Bharat Buildcon facilitated 150+ international buyer-seller meetings with buyers from across the globe, sitting face-to-face with Indian manufacturers with serious sourcing intent. Alongside this, a large volume of domestic buyer-seller meetings took place, making Bharat Buildcon a complete trade platform, global and local, under one roof.

The outcomes spoke for themselves. MOUs were signed on the show floor, a testament to the trust and business confidence Bharat Buildcon created between Indian manufacturers and global buyers. Nations including Moldova, Romania, Brazil, Bhutan, Jordan and many more expressed a strong interest in long-term sourcing partnerships with Indian manufacturers, a clear signal that India is now a preferred destination for building material procurement on the world map.

At the stall level, the energy was undeniable. India's sustainability products created moments of genuine excitement – unique, innovative, and unexpected; they drew buyers directly to exhibitor stalls, opening conversations that went far beyond a single transaction.

Countries Represented

One of the most defining achievements of Bharat Buildcon 2026 was the sheer scale and quality of its international representation. A total of 90+ countries from 6 continents converged at Yashobhoomi, New Delhi, sending 750+ buyers and making this edition the most globally diverse building materials exhibition ever held in India.

A defining highlight of Bharat Buildcon was the participation of designated delegation leaders, each entrusted with curating and leading a carefully selected group of industry buyers from multiple companies within their respective countries. Through their efforts, organised delegations from 12 countries - Moldova, Romania, Cameroon, Brazil, Lebanon, Senegal, Kyrgyzstan, Djibouti, Japan, Poland, the Maldives, and Afghanistan participated in the event.

This strong international representation underscores Bharat Buildcon's growing global stature and reinforces its position as a trusted platform for fostering international trade, strategic partnerships, and meaningful business connections.

The presence of such structured, leader-led delegations from across Europe, Asia, Africa, the Middle East, and South America is a clear indicator that Bharat Buildcon 2026 was not merely an exhibition, it was a global trade event of international significance, firmly positioning India as the world's most sought-after destination for building materials sourcing.

Export Markets Generated

Bharat Buildcon 2026 achieved remarkable international success, generating substantial export market opportunities. The event established a strong Near-Term Business Pipeline valued at \$35.14M, with confirmed business reaching approximately \$4.14M.

The exhibition facilitated high-impact engagement with 90+ countries, unlocking promising new avenues for global business collaboration and long-term partnerships.

Delegates actively engaged with international stakeholders across these markets, resulting in significant outcomes.

27.5% of orders were placed directly on-site, reflecting immediate buyer interest, while 86% of future business is expected through highly positive responses, direct outreach, and proactive communication established between buyers and sellers. These exceptional conversion rates demonstrate strong buyer confidence and underscore the high quality of leads and decision-making authority of the visiting delegations.

This impressive global outreach firmly establishes Bharat Buildcon as a premier platform for international trade and positions participating companies for accelerated export growth and sustained success in the global marketplace.

Trade Opportunities

India's trade landscape has never been more favourable, and Bharat Buildcon was perfectly positioned to leverage it.

India's active Free Trade Agreements with nations including Australia, Bhutan, Nepal, UAE, South Korea, Sri Lanka and many more have opened preferential access for Indian building materials into some of the world's fastest-growing construction markets. Bharat Buildcon brought these opportunities to life, putting Indian manufacturers directly in front of buyers from FTA nations, where tariff advantages and trade frameworks are already working in India's favour.

For exhibitors, this was not just an exhibition. It was a gateway. Every international meeting held, every MOU signed, and every long-term sourcing conversation initiated at Bharat Buildcon carried the added strength of India's growing trade architecture behind it. The competitive advantage was real and buyers from FTA countries recognised it.

And this is only the beginning. With several new Free Trade Agreements currently in negotiation, the window of opportunity for Indian building material exporters is set to widen further. Bharat Buildcon is committed to ensuring that Indian manufacturers are fully equipped and first in line to capture every opportunity that lies ahead.

Business Outcomes & Economic Impact

Business Outcomes & Economic Impact

This edition of Bharat Buildcon established itself as a massive commercial triumph and an economic catalyst for the global building materials industry, driving an estimated ₹400 Crore in total business generated through on-floor procurement, spot orders, and long-term annual supply contracts. The exhibition floor served as a high-octane hub for international trade, drawing an elite cohort of global buyers and trade delegations from major international markets including Brazil, Australia, Argentina, the UK, Moldova, Romania, Kyrgyzstan, and many more. This tremendous international footprint not only underscores Bharat Buildcon's position as a premier global sourcing platform but also highlights the soaring worldwide demand for Indian manufacturing excellence, quality compliance, and robust supply chain partnerships.

Strategic Partnerships

On the sidelines of Bharat Buildcon, a high-profile business delegation from Poland, organized by the Polish India Chamber of Commerce (PICC) and facilitated by Global Investment & Trade Advisors (GITA), engaged in an economic dialogue with Shri. Himanshu Prajapati (IAS), Executive Director of MPIDC Indore, and Mr. C.K. Prince, Head of the MPIDC Delhi Office. The discussion highlighted strong interest from Polish enterprises looking to establish or expand their presence in India across construction, building materials, smart cities, cosmetics, manufacturing, and business services. A key takeaway was the growing recognition of Madhya Pradesh as a strategic gateway to the Indian market. With its central location, expanding industrial ecosystem, investor friendly policies, and proactive governance, the state is well positioned as a long-term hub for European enterprises looking to scale within the India–Poland investment corridor.

Industry Insights

Bharat Buildcon 2026 addressed this intelligence deficit by operating as a live, multi-dimensional knowledge platform, consolidating market signals, technology demonstrations, policy communications, and peer learning into a concentrated and accessible format. Rather than presenting isolated product showcases, the exhibition created a structured environment where industry insight was actively generated and exchanged across stakeholder categories. Conferences, technical seminars, and curated exhibitor presentations enabled participants - from project developers and procurement managers to MSMEs and emerging contractors - to recalibrate their understanding of sector trajectories in real time, grounded in practical industry experience rather than abstracted data.

The breadth of stakeholder participation further amplified the insight value of the event. Investors gained nuanced exposure to market sentiment and emerging opportunity areas that conventional research channels rarely capture with equivalent depth. International delegates introduced comparative perspectives from global construction markets, enriching domestic discourse with cross-market relevance, helping establish a productive bidirectional exchange that strengthens both governance responsiveness and private sector confidence. In this respect, Bharat Buildcon demonstrated that well-structured exhibition platforms function not merely as commercial marketplaces, but as institutionalised mechanisms for the generation and dissemination of industry insight that materially advances sectoral decision-making and long-term competitiveness.

Future Technologies

Bharat Buildcon 2026 created an indispensable opportunity to fill the existing gap between the need and adoption of new technologies, as this event made the transition of technologies from ideation to application through commercial interface possible. The exhibition, which featured the exhibits like AI-enabled project management solutions, automated prefabrication systems, surveying drones and smart materials, allowed the buyers and contractors to assess the potential of each solution, thus minimising the informational asymmetry that is often the reason for postponement of technology adoption.

Delegates from other countries presented technology models that are internationally recognised and can be used for cross-border licensing and partnership programs with Indian companies. Investors had the opportunity to cooperate both with the young

startups and already proven innovators, finding those solutions that are scalable in accordance with India's development in the field of infrastructure. For policy makers, the exhibition became a source of structured information about the level of readiness of technologies in the industry.

Green Building & Sustainability

The Bharat Buildcon 2026 conference acted as a platform where green buildings innovation, supply, and demand converged within the Indian construction sector. Companies showcasing innovative construction materials, such as carbon-reduced cement, recycling aggregates, energy-efficient glass, and solar-powered roofing, offered marketable solutions in line with changing green compliance standards to the buyers and developers. Internationally attending delegates brought insights about construction models based on the concept of circular economy and passive designs for the enrichment of local knowledge frameworks.

Investors considered green infrastructure projects that were becoming more profitable due to international ESG policies, while the policy makers received firsthand information about industry expectations and changes required in terms of incentives and regulations to make sustainable construction more common. The sessions on green certification processes, life cycle costing, and carbon reduction helped stakeholders in gaining the necessary technical information about how to incorporate sustainable construction principles in their projects and purchases. Hence, the conference acted as a key mechanism of the industry for the promotion of green buildings.

SUCCESS STORIES

Poland-India Trade Milestones

Bharat Buildcon 2026: Four Days That Moved Poland–India Trade Forward

From 18th - 21st June, the Poland–India Chamber of Cooperation (PICC) led a 13-member Polish delegation to Bharat Buildcon 2026 in New Delhi - one of Asia's largest infrastructure exhibitions, with 1,000+ companies from 30+ countries.

We proudly hosted the Poland Pavilion, inaugurated by Dr. Shefali Bhujbal (MET Bhujbal Knowledge City), Piotr Panasiuk (Modular System), Małgorzata Tańska (Polish Investment and Trade Agency), and Amiet Barot (Bharat Cluster Ventures Private Limited) - under the Honorary Patronage of Urząd Marszałkowski Województwa Dolnośląskiego.

Four days, by the numbers:

50+ B2B meetings | 20+ institutional meetings | 3 trade agreements signed | 3 PICC MOUs signed (with Global Investment and Trade Advisors, K.G. Somani & Co., and The Union of Bilateral Chambers of Commerce from Romania in India)

We were honoured to welcome Mr. Rajesh Agarwal, Commerce Secretary, Ministry of Commerce and Industry, along with representatives from MP Industrial Development Corporation and Government of Madhya Pradesh.

Thank you to Bharat Buildcon, our Pavilion sponsors, and every partner and delegate who made this mission a success.

Poland–India Chamber of Cooperation: bridging Poland and India through trade, supply chains, and investment.

#PICC #PolandIndiaChamber #InternationalTrade #BharatBuildCon2026 #Poland #India

International Delegates

“Poland Chamber is building trade bridges between India and Poland, helping Indian MSMEs enter Europe via Poland while giving Polish firms access to India's market. He noted current bilateral trade stands at just \$3.5 billion against a potential \$50 billion, and thanked Bharat Buildcon for the platform to help close that gap. With Bharat Buildcon as a key partner, he expects the scale of this event to drive much larger deals between Indian and Polish businesses.”

Mr. Vincent Peter (VP, Poland Chamber of Cooperation)

"Participating in Bharat Buildcon with a delegation of 45 companies was a valuable experience. The exhibition showcased India's leading manufacturers and created excellent networking opportunities. We appreciate the quality, innovation, and professionalism displayed and look forward to strengthening business ties with India."

Ms. Christina (Chamber of Commerce, Moldova)

"India today is a completely different story from the India of 2010—it has grown tremendously and now offers both quality and competitive pricing to the world. With the India-EU Free Trade Agreement in place, it's time to convert this potential into real import-export numbers. The excellent organisation of Bharat Buildcon, along with the warmth of the Indian people, has strengthened our confidence in deepening bilateral cooperation between India and Romania."

Mr. Boris Foca, Romania (Chairman of the Business Association Eurasia)

"I've been genuinely impressed by the Indian government's commitment to the building industry at Bharat Buildcon. This convention will only get bigger and bigger as time goes by. We found Indian pricing, service, and product variety highly competitive, and the hospitality here has made it an honour to be part of. I'll be sharing this positive experience back home, and I encourage international buyers who haven't visited yet to see it for themselves."

Mr. Jungchul Lee (South Korea)

"Bharat Buildcon was a valuable opportunity to interact with major companies from India and around the world, calling the experience a reality of what they had hoped to achieve. Bharat Buildcon highlighted the strong quality and innovation of Indian products particularly citing cooling tiles ideal for Africa's high temperatures and noted that Indian companies are already well established in Senegal through construction and service delivery, with cooperation between the two nations growing steadily. This exhibition emphasized that Indian products offer excellent value, combining durability with competitive pricing, which reduces cost

while increasing benefits for businesses and has strong intent to lead a larger delegation from Senegal and Gambia to next year's edition, as such exhibitions should also be decentralized so Indian expertise can reach businesses across the world."

Mr. Assane Ndiaye (Senegal)

Exhibitor's Feedback

"Bharat Buildcon has always been an exceptional platform for Shree Cement. Year after year, Bharat Buildcon connects us with the right architects, builders, engineers, and dealer networks to take our business forward. What truly sets Bharat Buildcon apart from every other event is the quality of the gathering, business leaders here come with a genuine mindset for growth, and Bharat Buildcon gives us the perfect stage to meet them. Simply put, Bharat Buildcon delivers extraordinary results, and we look forward to this partnership continuing to grow in the years ahead."

- Mr. Puneet Verma, Shree Cement

"Our mission has always been twofold: to expand our business and showcase our products, but equally, to align with the Government's vision of ensuring that every home and every project across India recognizes the quality of what is being manufactured right here. That shared purpose is what brought us together with Bharat Buildcon. Over these three days, the response from government and private project stakeholders alike has been truly satisfying. Visitors came from cities across the country and from several nations abroad, and this overwhelming engagement will undoubtedly benefit Indian industry as a whole. I extend my sincere thanks to the Ministry and the entire Bharat Buildcon team for making this platform possible."

- Mr. Nitin Hapani, Kich Architectural Products Limited

"Bharat Buildcon stands as a pioneering platform, bridging the MSME sector with India's broader construction ecosystem in a way the country has never witnessed before. The response has been extraordinary; forging connections with buyers from Tier 2 and Tier 3 cities, offering deep insight into their unique supply chain challenges, and sparking genuine interest among foreign delegates. What began with cautious -

optimism has evolved into an overwhelmingly positive reception from buyers, sellers, and builders alike, far exceeding our expectations."

- Mr. Atul, Rafataar.Ai

"Bharat Buildcon is not only the exhibition, it is proving to be an international stage for India to showcase what we think and what we are capable of as a Team India. We are having more than 500 people visiting our booth on a daily basis, and this is fascinating to know that they are looking for similar solutions, what we are providing. I was fortunate enough that lots of ministers from the government also visited government is listening, I'm happy. This is a Mahakumbh of Indian manufacturing as well as domestic and international players, where everybody comes under one roof."

- **Kishore Chamria**, Co-Founder & CEO, Humbee

"Before coming here, our first mission was to connect with international buyers and to explore the international market. Bharat Buildcon is a platform from where we can explore Coverstone all over the world. Our expectations have been met there has been a level up in response, many international buyers have come. Bharat Buildcon's tagline is One Nation, One Expo, and all the building construction materials will be available under the same roof. Our business can expand globally from Bharat Buildcon."

- **Vimal Panara**, Director, Coverstone Ceramic LLP

"We are leading manufacturer and exporter of tiles. Our only objective is to find new buyers, connect with new people, do the networking part and the best part is we are launching new products, new surfaces here. Last year we were here with 21 surfaces and this year we are here with 36 surfaces, some of them exclusive to us you would find them only at Solorex and nowhere else. Bharat BuildCon is a good platform you get all the products under one roof, so it's easy for the buyers to visit."

- **Krushil Nesadia**, Global Marketing Specialist, Solorex

Media & Brand Impact

Media Coverage

“Bharat Buildcon 2026 - One Nation, One Expo.” India's premier exhibition for the building materials and construction industry, commenced on a grand note today at the Yashobhoomi Convention Centre, New Delhi (p. 33). The mega expo witnessed an overwhelming response with more than 25,000 visitors on the inaugural day, including architects, builders, developers, contractors, manufacturers, traders, policymakers, industry associations, and international buyers (p. 33). The event was inaugurated in the esteemed presence of Shri Manohar Lal, Union Minister, Ministry of Housing and Urban Affairs, Shri Jitin Prasada, Minister of State, Ministry of Commerce & Industry and Ministry of Electronics & Information Technology, and Shri Parshottam Rupala, Member of Parliament, alongside leading industrialists and representatives from the construction and building materials ecosystem (p. 33). Bringing together stakeholders from 90+ countries and over 100 cities across India, Bharat Buildcon 2026 has emerged as one of the largest global platforms for the building materials sector (p. 33). The exhibition features products and innovations across 24 major categories, including Ceramic & Stone, Hardware, Cement & Steel, Plywood & Laminates, Furniture, Sanitaryware, Electricals, Paints, Construction Technologies, and several other segments that collectively drive India's infrastructure and housing growth (p. 33).

India's construction and building materials sector is emerging as one of the most significant pillars of the nation's economic growth (p. 33). The construction sector currently contributes approximately 9% to India's GDP and supports employment for more than 70 million people, making it the country's second-largest employment generator (p. 33). Industry estimates suggest that India's construction market, valued at nearly USD 685 billion in 2025, is expected to surpass USD 1.24 trillion by 2034, driven by infrastructure investments, urbanization, housing demand, industrial expansion, and government-led development initiatives (p. 33).

Tremendous Growth in Trade Activities on Day 2 of Bharat Buildcon 2026; Strong Participation from Global Buyers, Industry Stalwarts, and Policymakers (Media Cove... p. 35)

New Delhi: India's premier construction event, Bharat Buildcon 2026 - One Nation, One Expo, registered remarkable industry turnout on its second day at Yashobhoomi Convention Centre, New Delhi (Media Cove... p. 35). High footprints were recorded from international buyers, architects, developers, contractors, and industry bodies, reinforcing the show's dominance as a top-tier B2B gateway (Media Cove... p. 35).

Director Vishal Acharya emphasized that the dynamic environment over the first two days underscores a global validation of the 'Make in India' ecosystem, facilitating direct cross-border trade pipelines (Media Cove... p. 35). Concurrently, Director Jitendra Kathiriya mentioned that economic impacts cascade deeply into allied auxiliary domains like logistics and storage (Media Cove... p. 35). The construction marketplace, estimated at USD 685 billion in 2025, is projected to surge beyond USD 1.24 trillion by 2034 (Media Cove... p. 35).

~ by Dainik Bhaskar

Bharat Buildcon 2026 continued its strong momentum on the second day at the Yashobhoomi Convention Centre, emerging as a major hub for business networking, trade partnerships and industry dialogue (Media Cove... p. 22). The event drew architects, developers, contractors, manufacturers, traders, policymakers and buyers from across India and overseas, reinforcing its reputation as one of the country's premier construction and building materials exhibitions (Media Cove... p. 22).

Over 90 countries participate as industry leaders discuss innovation, infrastructure and new trade opportunities (Media Cove... p. 22).

Addressing participants, Bharat Buildcon Director Vishal Acharya said the enthusiastic response from international and domestic stakeholders reflects growing confidence in India's manufacturing strength and industrial capabilities.

~by Free Press Journal

Bharat Buildcon 2026 – One Nation, One Expo. India's premier exhibition for the building materials and construction industry, continued to witness exceptional industry participation on its second day at the Yashobhoomi Convention Centre, New Delhi (Media Cove... p. 10). The expo attracted strong footfalls from domestic and international buyers, architects, developers, contractors, manufacturers, traders, policymakers, consultants and industry associations, further reinforcing its position as one of the largest business networking platforms for the sector (Media Cove... p. 10).

Speaking on the significance of the event, Mr. Vishal Acharya, Director, Bharat Buildcon, said, "The response witnessed during the first two days of Bharat Buildcon clearly demonstrates the growing global confidence in India's manufacturing ecosystem (Media Cove... p. 10)."

Highlighting the economic impact of such industry platforms, Mr. Jitendra Kathiriya, Director, Bharat Buildcon, said, "Events of this scale create value far beyond the exhibition halls (Media Cove... p. 10). They stimulate business activity across manufacturing, logistics, hospitality, transportation and services sectors (Media Cove... p. 10)."

~by The Hindu

Bharat Buildcon Emerges as an Influential Platform: Mandaviya

New Delhi: On the third day of Bharat Buildcon 2026, the premier exhibition for India's building materials, construction, and infrastructure sectors, Union Minister for Labour & Employment and Youth Affairs & Sports Mansukh Mandaviya visited the expo (Media Cove... p. 40). During his visit to the Yashobhoomi Convention Centre in New Delhi, he met with exhibitors, leading industry representatives, manufacturers, and international buyers to observe the latest innovations and capabilities displayed by Indian companies (Media Cove... p. 40).

Struck by the grand scale and massive response of the event, Mansukh Mandaviya stated that Bharat Buildcon has emerged as an extremely successful and influential platform for the industry (Media Cove... p. 40). Bharat Buildcon Director Vishal Acharya added that the presence of buyers from over 90 countries showcases the rising global trust in India's manufacturing capabilities (Media Cove... p. 40).

~by Pioneer

Union Minister Mansukh Mandaviya Visited Bharat Buildcon 2026

New Delhi: The premier infrastructure display received a massive boost on Day 3 when Union Minister Shri Mansukh Mandaviya evaluated the innovative tech showcased by domestic brands (Media Cove... p. 22).

The Minister interacted directly with cross-border buying delegations (Media Cove... p. 22). Director Vijay Aghara stated that the phenomenal response received for this debut edition validates the absolute necessity of a single unified national trade platform where international demand directly meets Indian innovation (Media Cove... pp. 22, 26).

~by Vir Arjun

Bharat Buildcon 2026, India's flagship exhibition for the building materials, construction and infrastructure sectors, received a major boost on Day 3 with the visit of Shri Mansukh Mandaviya, Union Minister of Labour & Employment and Youth Affairs & Sports, Government of India (Media Cove... p. 5). During his visit to the exhibition at Yashobhoomi Convention Centre, New Delhi, the Minister interacted with exhibitors, industry leaders, manufacturers and international buyers, while reviewing the latest innovations and capabilities showcased by Indian companies (Media Cove... p. 5).

Impressed by the scale and response to the event, Shri Mansukh Mandaviya remarked that Bharat Buildcon has emerged as a highly successful platform in its very first edition (Media Cove... p. 5). "Bharat Buildcon has achieved remarkable success in its inaugural edition. The number of visitors witnessed in just the first two days is nearly double the footfall many industry exhibitions receive during their entire duration (Media Cove... p. 5). This reflects the growing strength of India's building materials and construction ecosystem and the immense opportunities that exist for Indian manufacturers in domestic and global markets," he said (Media Cove... p. 5).

LEGACY & FUTURE

Bharat Buildcon Impact Index

A Platform for Business Growth

The exhibition enabled meaningful interactions between manufacturers, contractors, developers, architects, consultants, distributors, and government stakeholders, creating new opportunities for partnerships, procurement, and market expansion.

Driving Innovation

Live product demonstrations and technology showcases promoted the adoption of digital construction, prefabrication, green building materials, automation, and smart infrastructure solutions, accelerating industry modernization.

Supporting India's Growth Story

With India's construction sector contributing 9% of GDP and employing over 70 million people, Bharat Buildcon 2026 played a strategic role in fostering investment, innovation, and collaboration that support the nation's infrastructure ambitions and Vision 2027 goals.

Beyond the Numbers

Bharat Buildcon 2026 was more than an exhibition-it served as a catalyst for knowledge exchange, business development, and international engagement, reinforcing India's position as one of the world's fastest-growing construction and infrastructure markets.

Building Impact Beyond the Exhibition

- Accelerated business networking and strategic partnerships.
- Showcased next-generation construction technologies and sustainable solutions.
- Connected Indian manufacturers with global buyers and decision-makers.
- Enabled knowledge exchange through live demonstrations and industry interactions.
- Reinforced India's Vision 2027 by promoting innovation, collaboration, and infrastructure.

Legacy Page: Industry Met Opportunity, India Met The World

Where Industry Meets Opportunity. India Meets the World

Bharat Buildcon has become more than just an exhibition; it has become a platform that drives businesses and innovations while connecting people around the world. The platform has always managed to transform opportunities into partnerships and ideas into action by bringing together manufacturers, buyers, investors, policymakers, and industry leaders from across the globe.

Building Materials & Construction Industry by the Numbers:

- **9%+** Construction industry contribution to India's GDP.
- **USD 824.9 Billion** India's total exports during FY 2024-25, proving its increasing participation in international trade.
- **70+ Million** Number of people employed in India's construction ecosystem, which is one of the biggest employers in the country.
- **INR 12.2 Trillion** Expected government spending on infrastructure in FY 2026-27.
- **One Global Platform** uniting industry leaders, manufacturers, buyers, investors, policymakers, and delegates from other countries.

In all these years, Bharat Buildcon has made India one of the world's leading centers of construction and infrastructure, driving trade, technology, investments, and sustainable development in the process. When industry meets opportunity and India meets the world, Bharat Buildcon makes history.

Bharat Buildcon 2027:

Connecting Industries. Creating Opportunities. Making History.

"Building India's Future, Together"
"Build Bold. Build Bharat."

VISION 2027

As India advances toward its centenary of independence in 2047, Vision 2027 has emerged as a critical planning horizon for the construction, infrastructure, and manufacturing sectors - a period within which foundational decisions on technology adoption, capacity building, and sustainable development must be operationalised. For India, where the construction sector is projected to become the world's third largest by 2030, Vision 2027 represents the near-term crucible in which policy ambition must convert into execution capacity and market-ready industry ecosystems.

Bharat Buildcon 2026 laid the groundwork for this agenda, building toward an ambitious 2027 edition targeted to host 350 exhibitors and 900 international visitors – figures that reflect growing industry confidence in the platform's strategic relevance. The projected international participation will introduce cross-border perspectives on technology transfer, trade facilitation, and global best practices, while the expanded exhibitor base will mirror the breadth of India's construction value chain. For policymakers, this convergence will provide a real-time gauge of industry readiness; for investors, evidence based reassurance of sectoral momentum.

Bharat Buildcon is thus firmly positioned to translate Vision 2027 from policy aspiration into measurable, collaborative industry action.
